Agenda

Use Case

Live Demo Setup

How to integrate this component

Component Setup

UI5 Setup

Development Setup

Testing

wdi5, OPA5, GitHub Actions
Supported Scenarios

Deployment

Versioned Namespace

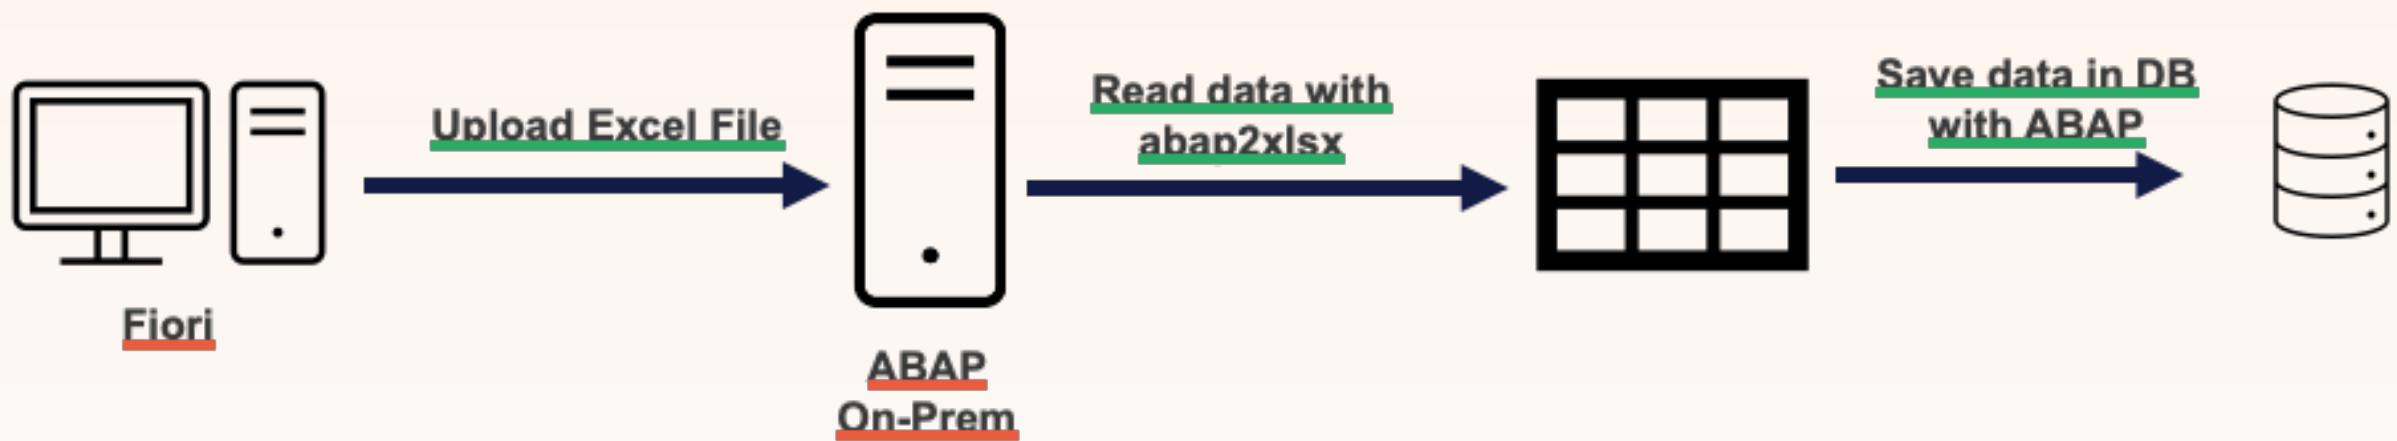

Open Source

Why?

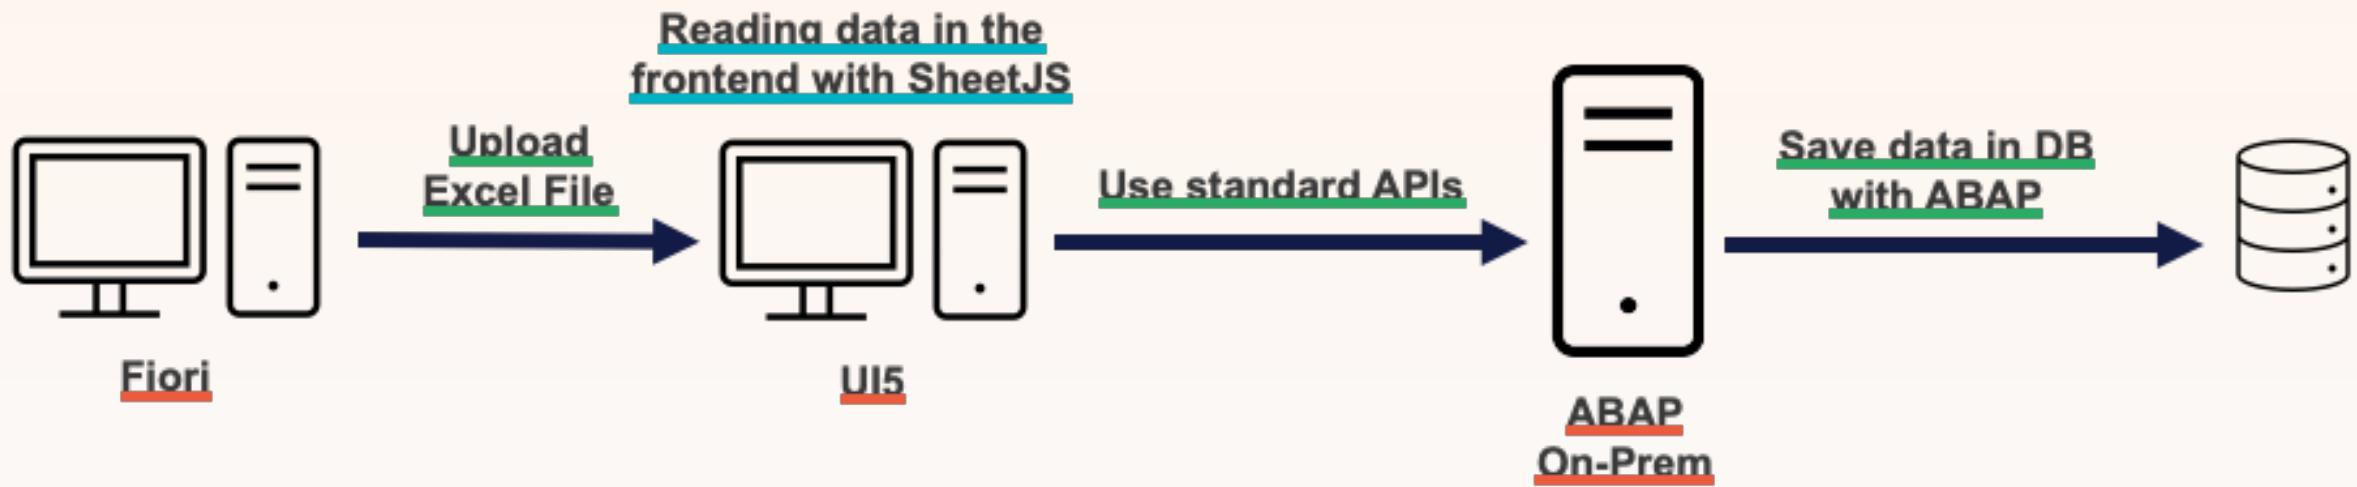

Use Case

Use Case

Use Case

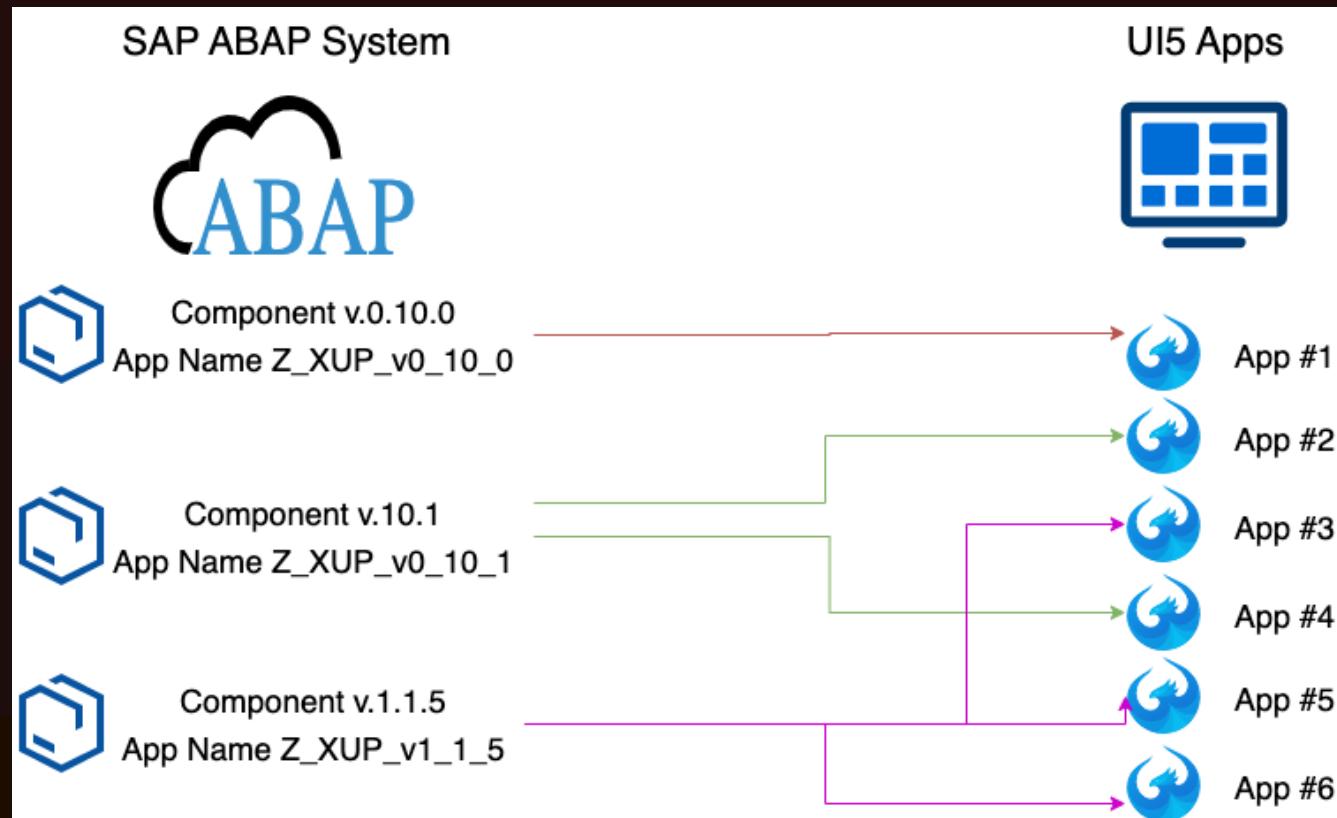

Live Demo

Testing

- **Wdi5**
 - Flexibel setup to test severall scenarios and ui5 versions
 - [Copy Test Apps Script](#)
 - [Testapps.json](#)
 - Using in GitHub Actions
- **OPA5**
 - Integration tests
 - Only V4 FE so far
 - Running with [ui5-test-runner](#)
 - Using in GitHub Actions
- **Testing on many scenarios and ui5 versions to achieve wide support**

Namespace

- Bigger libraries/components hard to upgrade because only one version
- A namespace per version
- Multiple version at the same time
- Easier upgrade from version

Open Source

Why?

Hi Vijay;

Please share the code [that you are using for this](#), if possible,

[Value help dialog related sample code](#) can be found at the below link. You can check and relate to your code.

[SAPUI5 Value help dialog](#)

Regards,

Sarjeet Singh

Date/Time Fields in Fiori Elements with CAP and OData V2 Proxy are not displayed

214 Views

Follow

RSS Feed

I have a CAP application with the OData V2 proxy.
For this I have generated a Fiori Elements App with V4 and V2.
You find the app here: <https://github.com/marianfoo/ui5-cc-excelUpload-sampleapp>

In CAP I have defined four elements that have to do date/time:

Somethings strange with the metadata when using managed compositions. If you model your composition like this:

```
entity Orders : cuid, managed {  
    OrderNo : String(22) @title:'Order Number'; //> readable key  
    Items : Composition of many OrderItems on Items.order = $self;  
    buyer : User;
```

I uploaded the delta changes to your project on your github repo here:

<https://github.com/marianfoo/ui5-cc-excelUpload-sampleapp/issues/1>

This should help you to fix the issue..

Open Source

The screenshot shows a GitHub issue page for the repository `SAP/ui5-tooling`. The issue is titled "Error: An extension with that name has already been added #777". It is marked as **Closed** and was opened by `marianfoo` 2 weeks ago, with 3 comments and fixed by `SAP`.

Steps to Reproduce the Issue

- `git clone https://github.com/marianfoo/ui5-cc-excelUpload`
- `pnpm i`
- `npm run start:v4fe:108` or `cd examples/packages/ordersv4fe && npm start`

Expected Behavior

Start UI5 App in a pnpm workspace.

Current Behavior

Start fails with error:

```
Failed to add extension fiori-tools-appreload to graph: An extension with that name has already been added
```

Projects

  Waiting for the debugger to disconnect...
```

To Reproduce

Steps to reproduce the behavior:

1. Setup

```
git clone https://github.com/marijanfoo/ui5-cc-excelUpload
git checkout feat/option-user
pnpm i
```
2. Start App

```
pnpm run start
```
3. Run Test

```
pnpm --filter ui5-cc-excelupload-sample test -- ordersv4fe 108 --spec SetAvailableOptionsListReport.test
```

Expected behavior
A clear and concise description of what you expected to happen.

Logs/Console Output

```
pnpm --filter ui5-cc-excelupload-sample test -- ordersv4fe 108 --spec SetAvailableOptionsListReport.test
```

Open Source – How to get Feedback?

- **Keeping the entry barrier low**
- Good documentation
- Live Demo
- Easy setup and integration
 - Like with → git clone && npm i && npm start
- Yeoman Generator
- (Re)use standard modules
- UI5 tooling / wdi5 / ui5 community modules

UI5con

Thank you!
